

BRILLIANT TECHNOLOGY FOR BRILLIANT SMILES

The Most Advanced Clear Aligner System

- SmartTrack® material allows for 75% more predictable tooth movement.¹
- SmartForce® attachments make it possible to treat more complex cases.
- Blue compliance indicator dot fades over time with proper wear to ensure teens wear aligners long enough to be effective.
- Invisalign Teen treatment includes six free replacement aligners.

Invisalign® clear aligners vs. other clear aligners

Invisalign clear aligners

Most other clear aligners

SmartTrack material for better comfort and fit

SmartForce attachments to apply the right force in the right places and move teeth more efficiently

Trimmed based on each patient's gum line to look better

Gentler, more precise force to give patients the results they expect

17 years of research and more than 700 patents supporting an ongoing commitment to innovation and improvement

Proven Effective for Nearly All Types of Cases

Nearly 4 million people, with cases ranging from mild to severe, have had their teeth straightened with Invisalign clear aligners. See more cases like the ones below and hear patient stories at InvisalignSmileGrants.com.

	Invisalign Teen	Traditional Braces	Ceramic Braces	Lingual Braces
Product Description	Custom-made clear aligners that fit closely to the teeth. Replaced every 2 weeks.	Stainless steel brackets and wires attached to the outside of teeth and manually adjusted throughout treatment.	Clear brackets attached to the outside of teeth.	Metal brackets and wires bonded to the back of the teeth.
Range of Cases	As effective as braces for nearly all cases.	Suitable for nearly all cases.	Suitable for nearly all cases.	Suitable for most mild to moderate cases.
Compliance	Average teen compliance is within recommended range of 20 to 22 hours a day.	Braces are fixed to the teeth. Levels of compliance with elastic bands varies.	Braces are fixed to the teeth. Levels of compliance with elastic bands varies.	Braces are fixed to the teeth. Levels of compliance with elastic bands varies.
Oral Hygiene	Brush and floss as usual, making it easier to protect teeth from decay.	Hard to brush and floss. Plaque may build up and cause tooth decay.	Hard to brush and floss. Plaque may build up and cause tooth decay.	Hard to brush and floss. Plaque may build up and cause tooth decay.
Injuries	Low risk of sports injuries and no emergency visits due to broken wires or brackets.	Brackets and wires may break, causing injury. Also, may cause injuries in contact sports.	Brackets and wires may break, causing injury. Also, may cause injuries in contact sports.	Brackets and wires may break, causing injury. Also, may cause injuries in contact sports.
Comfort	May cause temporary, minor discomfort, cheek or gum irritation, and a lisp. Generally less painful than braces.	May irritate the mouth, causing sores and ulcers.	May irritate the mouth, causing sores and ulcers.	May irritate the mouth, causing sores and ulcers. Can affect tongue position and speech.
Confidence	More than twice as many teens say Invisalign® treatment boosted confidence than say this about braces. ²	Nine out of 10 teens say braces keep them from fitting in with their peers. ²	Many teens report teasing and self-consciousness.	Many teens report teasing and self-consciousness.
Visible Results	See results at every stage.	Results less visible until braces are removed.	Results less visible until braces are removed.	Results less visible until braces are removed.
Aesthetics	Virtually invisible.	Highly visible.	Less visible than traditional braces.	Virtually invisible.
Removable	Easily removable for eating and special occasions.	Not removable.	Not removable.	Not removable.
Lifestyle	No restrictions on eating, drinking, sports, or activities. Short, noninvasive visits every 6 to 8 weeks.	Restrictions on foods, drinks, and sports. Braces take longer to fit than Invisalign clear aligners and are usually tightened every 8 weeks.	Restrictions on foods, drinks, and sports. Braces take longer to fit than Invisalign clear aligners and are usually tightened every 8 weeks.	Restrictions on foods, drinks, and sports. Braces take longer to fit than Invisalign clear aligners and are usually tightened every 8 weeks.
Cost	The cost of Invisalign treatment is similar to that of braces. As with other medical treatments, only your doctor can determine the cost of orthodontic treatment. Ask your doctor how low your payments can be.
